SEOUL DECLARATION FOR SAFE, INNOVATIVE AND INCLUSIVE AI BY PARTICIPANTS ATTENDING THE LEADERS' SESSION OF THE AI SEOUL SUMMIT, 21st MAY 2024

- 1. We, world leaders representing Australia, Canada, the European Union, France, Germany, Italy, Japan, the Republic of Korea, the Republic of Singapore, the United Kingdom, and the United States of America, gathered at the AI Seoul Summit on 21st May 2024, affirm our common dedication to fostering international cooperation and dialogue on artificial intelligence (AI) in the face of its unprecedented advancements and the impact on our economies and societies.
- 2. Building on the work laid out at the Al Safety Summit held at Bletchley Park in the United Kingdom on November 2023, we recognize that Al safety, innovation, and inclusivity are interrelated goals and that it is important to encompass these priorities in international discussions on Al governance to address the broad spectrum of opportunities and challenges that the design, development, deployment, and use of Al presents and may present.
- 3. We recognize the importance of interoperability between AI governance frameworks in line with a risk-based approach to maximize the benefits and address the broad range of risks from AI, to ensure the safe, secure, and trustworthy design, development, deployment, and use of AI. We continue to focus on supporting the operationalisation of the Hiroshima Process International Code of Conduct for Organizations Developing Advanced AI Systems. We recognize the particular responsibility of organizations developing and deploying frontier AI, and, in this regard, note the *Frontier AI Safety Commitments*.
- 4. We support existing and ongoing efforts of the participants to this Declaration to create or expand Al safety institutes, research programmes and/or other relevant institutions including supervisory bodies, and we strive to promote cooperation on safety research and to share best practices by nurturing networks between these organizations. In this regard, we welcome the Seoul Statement of Intent toward International Cooperation on Al Safety Science, which is annexed to this Declaration.
- 5. We call for enhanced international cooperation to advance Al safety, innovation and inclusivity to harness human-centric Al to address the world's greatest challenges, to protect and promote democratic values, the rule of law and human rights, fundamental freedoms and privacy, to bridge Al and digital divides between and within countries, thereby contributing to the advancement of human well-being, and to support practical applications of Al including to advance the UN Sustainable Development Goals.

- 6. We advocate for policy and governance frameworks, including risk-based approaches, that foster safe, innovative and inclusive Al ecosystems. Frameworks should facilitate a virtuous cycle between human creativity and the development and use of Al, promote socio-cultural, linguistic, and gender diversity, and promote environmentally sustainable development and use of technology and infrastructure throughout the life-cycle of commercially and publicly available Al systems.
- 7. We affirm the importance of active multi-stakeholder collaboration, including governments, the private sector, academia, and civil society to cultivate safe, innovative and inclusive Al ecosystems, and the importance of cross-border and cross-disciplinary collaboration. Recognizing that all states will be affected by the benefits and risks of AI, we will actively include a wide range of international stakeholders in conversations around AI governance.
- 8. We aim to strengthen international cooperation on Al governance through engagement with other international initiatives at the UN and its bodies, G7, G20, the Organization for Economic Co-operation and Development (OECD), the Council of Europe, and the Global Partnership on Al (GPAI). In this light, we acknowledge the Hiroshima Al Process Friends Group, welcome the recently updated OECD Al principles, and the recent adoption by consensus of the United Nations General Assembly resolution "Seizing the opportunities of safe, secure and trustworthy artificial intelligence systems for sustainable development" that solidified the global understanding on the need for safeguards for Al systems and the imperative to develop, deploy, and use Al for good, and welcome discussions on the Global Digital Compact in advance of the Summit of the Future in September 2024 and look forward to the final report of the UN Secretary-General's High-level Advisory Body on Al (HLAB).
- 9. Acknowledging the value of Al Summit dialogues as a high-level forum to advance discussion on Al governance which facilitates Al safety, innovation and inclusivity, we look forward to our third gathering at the upcoming Al Action Summit to be held in France.
